

## An overall description of the assignment

I was asked to build a login page and profile page using firebase database. To be honest, I've never done anything like this. I learned through YouTube and this is the following result:

I added the users through firebase and through their ID I manually added the rest of the details about each user.

For each user I set a password: first name + 1234

For example: email: **tom@gmail.com** password: **tom1234**

Identifier	Providers	Created ↓	Signed In	User UID
eran@gmail.com		Oct 11, 2021		chXWZ7RcggUM510fn5aHS3mOs...
niv@gmail.com		Oct 11, 2021		zCSKdQSm14NgDHfTKZGlPzI713
vered@gmail.com		Oct 11, 2021		lIGh30zkojNtuP0tDQ11rfVwm002
tom@gmail.com		Oct 11, 2021		vPSDIWKZXPQTXqFAZckMaMI4eD2
noamshneor4@gmail.com		Oct 10, 2021	Oct 11, 2021	Yqwbg2AmkbMBxhg1I0X2ynuDSRU2

After logging in, the details are supposed to appear on the profile page, but unfortunately all my attempts to link the profile page to the database were unsuccessful. Only the email appears.
